KONE elevators
for airports

VISUAL OPTIONS, CAR AND SHAFT DIMENSIONS FOR
KONE elevators for airports

Airports are unique and demanding environments where a smooth, safe flow of people and goods is critical to daily operations. KONE’s eco-efficient elevator solutions for airports include both heavy-duty passenger elevators and freight elevators, and are supported by our world-class consultation and planning services that cover every aspect of people flow within and between airport buildings.

**Recommended solutions**

- **Elevators for heavy traffic environments.** These spacious, high-capacity elevators provide comfortable, efficient transportation for passengers with baggage. Particularly effective for linking metro and train stations with terminal buildings.

- **Visually appealing elevators for terminal buildings.** For smooth people flow across terminal buildings, for example in shopping areas and terminal stations, in combination with autowalks. These highly visible elevators are often also used as architectural features, and when installed in a glass shaft and fitted with glass walls can offer a panoramic view over surrounding areas.

- **Elevators for improved accessibility in terminal buildings.** These low-duty elevators provide comfortable transportation for passengers with special needs, such as those using wheelchairs or traveling with strollers.

- **Large elevators for automated people mover (APM) stations.** Provide comfortable and efficient transportation for high traffic volumes moving to and from stations.

- **Air traffic control tower elevators.** Dedicated, rapid transportation for air traffic control staff that can be integrated with access control systems for improved security.

- **Service elevators.** Designed to enable efficient and reliable movement of airport staff and goods within and between terminal buildings.

- **Freight elevators.** Durable, reliable solutions for demanding applications. These high-capacity elevators facilitate the smooth flow of goods around the airport. Can transport loads of up to 5,000 kg.

All our elevator solutions are based on the eco-efficient KONE EcoDisc® hoisting motor, which is designed to cut energy consumption and provide industry-leading ride comfort in all traffic conditions. We offer reliable, space-saving solutions with the machine room-less KONE MonoSpace® and KONE TranSys™, as well as compact solutions for a wide variety of applications based on the KONE MiniSpace™.

Why choose KONE?

As well as providing visually appealing, durable solutions that improve safety and cut energy costs, KONE also has decades of experience in improving people flow at airports around the world. We can advise on the most efficient way to manage passenger and goods transport in these diverse environments, from retail spaces and check-in areas to security and goods routes.

**Functional, reliable, and safe**

- Excellent accessibility, with wide-opening doors that enable easy entry and exit. This increases comfort and convenience for people with limited mobility and passengers traveling with baggage or strollers.
- High reliability enabled by the KONE EcoDisc® hoisting motor, with more than 800,000 units operating globally, and KONE’s world-class range of flexible preventive maintenance solutions.
- Standards-compliant, with equipment that meets and exceeds all relevant safety and accessibility standards and regulations, including:
  - EN 12015, which regulates the escape of electromagnetic energy from a product to the external environment.
  - EN 12016, which regulates the level of shielding a product must have against electromagnetic disturbances in the surrounding environment.
- Improved security through the ability to integrate elevators with airport access control systems.
- Convenient, cost effective monitoring with KONE E-Link™, which gives you a complete, real-time overview of equipment status from a single location.

**Eco-efficient and cost effective**

- KONE’s regenerative solutions can provide up to 30% energy savings by recovering the energy generated when the elevator is used.
- As well as being up to 80% more efficient than halogen lighting, LED lighting also lasts up to 10 times longer.
- Standby solutions provide substantial energy savings by powering down the equipment when it is not in use.

**Designed to last**

- Enjoy the industry’s most flexible and versatile design offering, with over 100 materials and accessories, offering millions of possible combinations.
- Protect your investment with EN81-71 Category 1 and 2 compliant materials and KONE KSS 140 vandal-resistant signalization.

KONE passenger elevator

Smooth, safe people flow, excellent reliability, and the best possible passenger experience in all traffic conditions.

- KONE’s space-efficient elevators maximize the use of the available shaft space, which means a larger, more comfortable elevator car can be installed. As well as increasing capacity, this also improves accessibility for all passengers.
- The gearless KONE EcoDisc® hoisting motor enables reliable operation and minimizes maintenance costs and downtime.
- Our award-winning design offering helps you create a functional and durable elevator that fits seamlessly with your airport’s design features and provides a pleasant passenger experience.

KONE service elevator

Reliable, convenient transportation of airport staff and goods within and between terminal buildings.

- Accurate leveling makes loading and unloading easy.
- Spacious car designed for transporting large loads.
- Full-width doors allow easy entry and exit, and maximize the available car space.
- Durable hoisting equipment and car interiors designed to cope with the demands of heavy loads and heavy-duty use.

KONE provides innovative and eco-efficient solutions for elevators, escalators, automatic building doors and the systems that integrate them with today’s intelligent buildings.

We support our customers every step of the way; from design, manufacturing and installation to maintenance and modernization. KONE is a global leader in helping our customers manage the smooth flow of people and goods throughout their buildings.

Our commitment to customers is present in all KONE solutions. This makes us a reliable partner throughout the life cycle of the building. We challenge the conventional wisdom of the industry. We are fast, flexible, and we have a well-deserved reputation as a technology leader, with such innovations as KONE MonoSpace®, KONE EcoMod™ and KONE UltraRope™.

KONE employs on average 47,000 dedicated experts to serve you globally and locally.
